Profile

A Software Engineer who loves automating processes and building efficient solutions. I work with Python, JavaScript, TypeScript, C#, PHP, and SQL, with experience in automation, APIs, databases, data processing, and web development using HTML, CSS, Flask, and modern frontend frameworks.

I also work with data processing, ETL, and visualisation tools like Power BI to turn raw data into meaningful insights. Alongside my technical background, I have experience in administration, marketing, sales, and retail, which has helped me develop strong leadership and problem-solving skills.

I enjoy working with teams, sharing knowledge, and creating a positive work environment. Always learning and improving!

Work Experience

04/2023
Sydney, New South
Wales, Australia
